

News release from Vestas-American Wind Technology

Portland, 20 September 2018

Vestas secures 144 MW order from Avangrid Renewables in the USA

Vestas has received an order for 144 MW of V136-3.45 MW turbines delivered in 3.6 MW Power Optimised Mode from Avangrid Renewables for the Otter Creek Wind Farm in Illinois. The full Otter Creek nameplate capacity is 158 MW, and includes previously purchased Vestas components.

“The proven technology of Vestas wind turbines makes for a great fit as we start to mobilize construction at our newest Illinois wind farm”, said David Carroll, Vice President, Projects, at Avangrid Renewables. *“Capitalizing on their advanced platform enables us to deliver a competitive project that brings substantial long-term economic benefits to Allen and Otter Creek townships in LaSalle County”.*

“We’re pleased to build on our portfolio with Avangrid Renewables, and expand the 4 MW platform footprint throughout the U.S.” said Chris Brown, President of Vestas’ sales and service division in the United States and Canada. *“The production, transportation, and construction of these turbines will support substantial numbers of jobs and stimulate millions of dollars of spending across a thriving American supply chain, while the long-term operations of the project will deliver clean, low-cost energy to the community, and generate millions of dollars in tax revenue and land lease payments.”*

The order includes supply and commissioning of the turbines as well as a multi-year Active Output Management 5000 (AOM 5000) service agreement, designed to maximize uptime and energy production and ensure optimized performance for the lifetime of the project.

Turbine delivery will begin in the second quarter of 2019 with commissioning scheduled for the third quarter.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with 94 GW of wind turbines in 79 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 79 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 24,300 employees are bringing the world sustainable energy solutions to power a bright future.
