

News release from Vestas Mediterranean

Madrid, 27 September 2018

Vestas extends market leadership with a 225 MW order for four projects in Argentina

Vestas has received a 225 MW order from Central Puerto S.A., one of the leading energy groups in Argentina, for four different wind parks. The order underlines Vestas' leading position in Argentina's growing wind energy market, having secured the majority of the volume from the auctions, and it follows Vestas' announcement of a new assembly facility in Argentina earlier this year.

The order includes four wind parks in total with three located in the Buenos Aires province and one project in the Córdoba province. In the Buenos Aires province, the order includes La Genoveva I wind park featuring 21 V136-4.2 MW turbines, as well as the La Genoveva II and La Castellana wind parks comprising 11 and 4 V126-3.45 MW turbines respectively delivered in 3.8 Power Optimised Mode. The fourth project, the Achiras II wind park, in the Córdoba province, will comprise 21 V136-3.45 MW turbines delivered in 3.8 Power Optimised Mode.

All four projects include 5-year Active Output Management 5000 (AOM 5000) service agreements. The first project is expected to be delivered in the second quarter of 2019, and delivery for the last project is expected by the second quarter 2020.

"This order underlines how Argentina's growing wind energy market and Vestas' footprint in the country have evolved in parallel. With our new production facility and more than 1.3 GW installed capacity or under construction, Vestas' commitment to Argentina remains strong", says Andrés Gismondi, Vestas South Cone Sales Director.

The total of 57 wind turbines will be manufactured at the assembly facility to be inaugurated soon in Campana, in the Buenos Aires province. The towers for these projects will also be produced locally in partnership with Argentinian suppliers.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with 94 GW of wind turbines in 79 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 79 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 24,300 employees are bringing the world sustainable energy solutions to power a bright future.
