Vestas secures 52 MW EPC contract from Jordanian auction

Vestas has received an engineering, procurement and construction (EPC) order for the 52 MW Tafila wind park in Jordan. The order was placed by Daehan Wind Power, a special-purpose company co-invested in by the South Korean utility Korean Southern Power (KOSPO) and Daelim Energy.

The contract includes the supply, transport, installation and commissioning of 15 V136-3.45 MW turbines and it is Vestas' fourth EPC contract for utility-scale wind parks in the country.

"This comprehensive EPC contract reinforces our leadership in the Jordanian wind energy market and demonstrates our project management expertise and broad range of auction capabilities. We are grateful to partner with Daehan and we are pleased to increase our contribution to Jordan's transition to renewable energy sources", highlights Rainer Karan, General Manager of Vestas Mediterranean Eastern Cluster.

The order includes a 20-year Active Output Management 5000 (AOM 5000) service agreement for the operation and maintenance of the wind park, while turbine delivery is planned for the third quarter of 2019, whilst commissioning is expected in the first quarter of 2020.

Byung-hee Min, Vice President of Overseas Business Department of KOSPO and Chairman of Daehan Wind Power Company, said *"Thanks to the Vestas' cooperation, we took a first step into the Jordanian renewable energy market and KOSPO will be able to demonstrate the know-how accumulated in the construction and operation from domestic wind power plants"*.

In-Gyu Kim, Vice President of Daelim Energy and Vice Chairman of Daehan Wind Power Co., said *"To take a first step into a new market is always challenging, and in this project we had to negotiate with a wide range of stakeholders. I am pleased that Daelim Energy has made this project successful with our partners. We will do our best to advance into overseas markets such as South America, Southeast Asia, Middle East and Africa"*.

Vestas pioneered wind energy in Jordan in 1996 and remains the market leader with more than 55 percent of the country's total wind capacity.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 97 GW of wind turbines in 79 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 82 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 24,300 employees are bringing the world sustainable energy solutions to power a bright future.
