Vestas wins 108 MW EPC order in Mexico

Vestas has secured an engineering, procurement and construction (EPC) order for the 108 MW Energía Sierra Juárez II wind park, to be located in Tecate, Baja California, Mexico. The contract includes the supply, transport, installation and commissioning of 26 V150-4.2 MW of which some are delivered on 4.0 MW operating mode.

The order has been placed by Energía Sierra Juárez, a joint venture between IEnova, a Sempra Energy Company, one of the largest private energy companies in Mexico, and Saavi Energía, the third largest independent energy producer in the country. The order also includes an Active Output Management 5000 (AOM 5000) service agreement for the operation and maintenance of the wind park over the next 15 years.

The energy produced by this project will be commercialised through a PPA contract with the utility San Diego Gas & Electric.

"At Energía Sierra Juárez, we are pleased to partner with Vestas on sustainable energy solutions", said Tania Ortiz, IEnova's CEO. "This project reinforces our commitment to develop energy infrastructure that promotes Mexico's growth and development and to continue positioning ourselves as a leading clean energy generation company in the country".

"I would like to thank Energía Sierra Juárez for placing their trust in Vestas again in this second phase of the existing 155 MW wind park. This important project underlines the competitiveness of wind energy in Mexico and our ability to provide the lowest cost of energy to our customers. It also showcases the value of Vestas' local experience and proven ability to deliver site-specific solutions in the country", says Agustín Sánchez-Tembleque, General Manager of Vestas México.

Turbine delivery is expected in the third quarter of 2020 whilst commissioning is planned for the second quarter of 2021.

Vestas pioneered the Mexican wind energy market in 1994, when it erected its first commercial wind turbine. Since then, Vestas has accumulated over 2.4 GW of installed capacity or under construction in the country.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 113 GW of wind turbines in 81 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and more than 96 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers,

Vestas' more than 25,000 employees are bringing the world sustainable energy solutions to power a bright future.
