

## News release from Vestas Northern and Central Europe

Hamburg, 23 March 2020

### Vestas secures 47 MW order in the UK

Vestas has secured a 47 MW wind project in Northern Ireland from ERG, one of the leading wind energy operators in the European market, that will feature 13 V112-3.45 MW turbines in 3.6 MW operating mode to maximise energy production and deliver a competitive cost of energy.

This order continues last year's positive trend for Vestas in the UK's post-subsidy market where it secured an order intake of more than 200 MW, confirming onshore wind energy's increasing competitiveness in the UK.

*"The Evishagaran wind project enables a highly competitive business case for our valued long-term business partner ERG and offers the lowest cost of energy to the energy consumer. Demonstrating our strong experience and track record in a merchant environment, this project marks another step forward for renewable energy in the UK",* states Anna Schlasberg Wachtmeister, Director Sales UK, Vestas Northern & Central Europe.

The project will feature a VestasOnline® Business SCADA solution, lowering turbine downtime and thus optimising the energy output. The contract further includes supply, installation and commissioning of the wind turbines, as well as a 10-year Active Output Management 5000 (AOM 5000) service agreement.

Turbine deliveries are expected to begin in the second quarter of 2021, while commissioning is planned for the second and third quarter of 2021.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 113 GW of wind turbines in 81 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 96 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 25,000 employees are bringing the world sustainable energy solutions to power a bright future.
