

## News release from Vestas Northern and Central Europe

Hamburg, 26 March 2020

### Vestas secures 68 MW auction win in Poland

Through working closely with our customer to optimise their projects for competitive auctions, Vestas has secured a 68 MW order for three projects in Poland. Awarded at the Polish wind-solar-energy auction, in December 2019, the projects attest to the increasing competitiveness of wind energy.

To secure these projects, located in northern and western Poland, Vestas has developed site-specific solutions that utilise the flexibility of the trusted 2 MW platform. These tailored solutions are set to maximise power production, while catering for specific local site constraints.

For the 29 MW Ustka project, Vestas will deploy 13 V100-2.0 MW turbines delivered in 2.2 MW Power Optimised Mode and a 27-year Active Output Management (AOM 4000) service agreement. The 24 MW Górzycza and 15 MW Parnowo projects will comprise 12 V100-2.0 MW and seven V110-2.0 MW turbines with the latter delivered in 2.2 MW Power Optimised Mode, combined with Active Output Management (AOM 4000) service contracts for 30 years.

*“This order emphasises our capability to provide wind energy solutions in combination with long-term service agreements that can enable our customers to build winning bids in auctions”,* says Nils de Baar, President of Vestas Northern & Central Europe.

The three wind energy projects will feature a VestasOnline® Business SCADA solution, lowering turbine downtime and thus optimising the energy output. The contract further includes supply, installation and commissioning of the wind turbines, as well as long-term Active Output Management 4000 (AOM 4000) service agreements.

Deliveries are expected to begin in the first quarter of 2021, while commissioning is planned for the third quarter of 2021.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 113 GW of wind turbines in 81 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 96 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 25,000 employees are bringing the world sustainable energy solutions to power a bright future.
