

## News release from Vestas Asia Pacific

Singapore, 6 April 2020

### Vestas supplies V117-4.2 MW turbines to MHI Vestas Offshore Wind for Akita Noshiro Offshore Wind Farm Project

Vestas has received a 139 MW order from MHI Vestas Offshore Wind to supply 33 Vestas V117-4.2MW typhoon variant turbines for Akita Noshiro Offshore Wind Farm Project. Located in Japan's northern Akita prefecture, the wind farm will be the first utility-scale offshore project in Japan.

The wind farm is owned by Akita Offshore Wind Corporation, a special purpose company led by Marubeni Corporation, with additional Japanese project sponsors. MHI Vestas Offshore Wind will be responsible for the overall construction of the project.

The V117-4.2 MW Typhoon turbine offers maximum energy production in medium to high wind speeds. It strengthens the 4 MW platform's performance in extreme wind conditions expanding reach into areas with very strong wind and typhoon type weather. Specifically designed for the Japanese climatic conditions, this technology has fulfilled all local certification requirements and can be applied for both onshore and offshore projects.

*"We are happy to be able to support MHI Vestas, our joint venture that focuses on offshore wind, in their first firm order in Japan. This order showcases Vestas' experience in Japan and our comprehensive turbine portfolio to have the right turbine variant to fit the market's needs",* said Clive Turton, President of Vestas Asia Pacific.

Vestas installed its first turbine in Japan in 1995 and has since installed a total of 629 MW.

*"Japan is an important market to us, and we will continue to work closely with our customers and partners to offer best-in-class renewable energy solutions to support Japan's clean energy transition,"* said Netoshi Kuriyama, Vice President of Sales and Japan Country Manager for Vestas. *"With wind becoming a more important energy source in Japan, we are witnessing drastic increase in activities".*

Turbine delivery is scheduled in the second half of 2021 and installation is expected to commence in 2022.

MHI Vestas Offshore Wind is a joint venture between Vestas Wind Systems A/S and Mitsubishi Heavy Industries.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 113 GW of wind turbines in 81 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 96 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 25,000 employees are bringing the world sustainable energy solutions to

power a bright future.
