

## News release from Vestas Mediterranean

Madrid, 30 September 2020

### Vestas' secures new auction win in Italy

Vestas has secured a 28 MW order from the AM Energie Rinnovabili for the Serra del Vento project, located in the Palermo province. The order includes the supply and installation of eight V136-3.45 MW wind turbines as well as a 20-year Active Output Management 5000 (AOM 5000) service agreement.

This order adds to the more than 1.1 GW of contracts signed by Vestas in Italy's auction system, which showcases the company's ability to support customers in submitting winning auction bids. The order also reinforces Vestas' leadership in the country's wind energy sector, where it has installed more than 4.3 GW since 1991, accounting for a 40 percent market share.

*"I would like to thank AM Energie Rinnovabili for placing their trust in Vestas' technology for the first time. Our cutting-edge technology together with our long term service offering provides a highly competitive levelised cost of energy. This LCoE allows our customers to optimise their business case certainty, which is key to successfully compete in the auctions", says Vestas Vice President of Sales Region South Europe and Turkey, Rainer Karan.*

Turbine delivery will begin in the first quarter of 2021 with commissioning scheduled for the the second quarter of the same year.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 117 GW of wind turbines in 81 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 104 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 25,500 employees are bringing the world sustainable energy solutions to power a bright future.
