

## News release from Vestas-American Wind Technology

Portland, 23 December 2020

### Vestas wins 138 MW repowering order in USA

Vestas has received a 138 MW order to repower a wind project in the U.S. With this order, Vestas will replace 73 existing V80-1.8 MW turbines with a total of 73 V110-2.0 MW turbines, including previously purchased 2 MW components.

With the largest global installed capacity and service base, Vestas is uniquely positioned to harness operational and technical insights gained from the largest wind data repository in the world, to develop repowering solutions for Vestas and non-Vestas wind turbines alike.

Repowering offers solutions for asset owners facing the higher operation and maintenance costs of an aging fleet and mitigates the complexities of sourcing spare parts for obsolete technology.

The order includes supply, installation, and commissioning of the turbines as well as 20-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

Turbine delivery will begin in the second quarter of 2021 with commissioning scheduled for the fourth quarter of 2021.

The customer and project are undisclosed per the customer's request.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 122 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 108 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 25,500 employees are bringing the world sustainable energy solutions to power a bright future.
