

## News release from Vestas Northern and Central Europe

Hamburg, 1 March 2021

### Vestas adds 67 MW EnVentus order along with a long-term service agreement in Sweden

Vestas has bolstered its Swedish pipeline with a 67 MW order for the Grönhult project in southwest Sweden from The Renewables Infrastructure Group (TRIG). Vestas will supply, install and commission 12 V162-5.6 MW turbines, part of Vestas' EnVentus platform. A long term 30-year Active Output Management 5000 (AOM 5000) service agreement will provide maximum security for the Grönhult project throughout its lifetime by optimising park performance and limiting downtime.

The Grönhult project was acquired by TRIG from Vattenfall in February 2021, and is ready-to-build. The project is located in the Gislaved region in southwest Sweden, and will provide clean, sustainable wind power for over 20,000 Swedish households.

Juan Furones, Vice President, Sales North & West, Vestas Northern & Central Europe, said of the order: *"The V162-5.6 MW is an optimal turbine for the Grönhult project's wind speeds and site specifications, and we're delighted to be partnering with The Renewables Infrastructure Group for the delivery and construction of our first project together in Sweden. The EnVentus platform continues to increase its footprint into the market and we're pleased TRIG has entrusted Vestas with this ready-to-build project."*

Richard Crawford, Director, Infrastructure at InfraRed Capital Partners, TRIG's investment manager added: *"We are pleased to expand our presence in Sweden with high quality partners. The Nordic region represents a key market for the company with a strong pipeline and favourable economics for onshore wind."*

Vestas has currently installed over 5 GW capacity of wind turbines in Sweden,

First turbines will be delivered to the project in the second quarter of 2022, with the project expected to become operational in the fourth quarter of 2022.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 132 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
