Vestas signs 102 MW order including EnVentus turbines in Greece

Rokas Renewables, a subsidiary of Iberdrola Renewables, has placed a 102 MW order for three wind projects in Greece. The order includes the supply and installation of twenty V150-4.2 MW wind turbines for the Askio II and Askio III wind parks, as well as three V162-6.0 MW EnVentus wind turbines for the Rokani wind park. The three projects were awarded in the Greek renewables auctions held in July 2020.

Vestas will service the Askio II and Askio III projects under a 5-year and the Rokani project under a 10-year-Active Output Management 5000 (AOM 5000) service agreement.

Rokani will be the first project to feature turbines from the EnVentus platform in Greece. The V162-6.0 MW will also become the largest rotor ever installed in the country.

“This order showcases how Vestas’ latest technology can help our customers optimise their business cases and successfully compete in the auction system. We expect the extremely low levelised cost of energy and high reliability of our 4 MW and EnVentus platforms will play a major role in helping Greece achieve its renewable energy goals”, says Marios Zangas, Head of Vestas Hellas.

“Rokas Renewables is committed to increase its strong footprint in Greece further in a sustainable and competitive way. We expect our partnership with a technology leader like Vestas will assist us to reach our goals”, adds Thanasis Tsantilas, Country Manager for Iberdrola Renewables in Greece

Turbine delivery for all three projects is planned for the first half of 2022, whilst commissioning is planned for the second half of the same year.

Vestas pioneered the Greek wind market in 1986 and since then it has installed around 1.9 GW of wind turbines. This new order reinforces the company’s leading position in the market where it holds 45 percent market share.

About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 132 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
