

## News release from Vestas Northern and Central Europe

Hamburg, 31 March 2021

### Vestas adds double EnVentus order in Finland

Vestas will supply EnVentus turbines to the Keso and Kaukanen projects in the Northern Ostrobothnia region in Finland, both being developed by longtime partner Puhuri Oy. The two orders will cover a total volume of 90 MW, and after the Parha and Hankila orders in 2019, represent the third and fourth Puhuri Oy projects that will be supplied with Vestas' EnVentus turbines.

Keso will see seven EnVentus V162-6-0 MW turbines installed in Haapavesi municipality and eight EnVentus V162-6.0 MW turbines will power the Kaukanen project, which will be situated in the Kannus municipality.

The turbines will be serviced through a 25-year Active Output Management 5000 (AOM 5000) service agreement, providing power performance certainty and Vestas' industry-leading service expertise throughout the lifetime of the project.

Juan Furones, Vice President, Sales North & West, Vestas Northern & Central Europe, said of the order: *"The global applicability of our EnVentus platform is shown yet again by the selection for turbine supply at the Keso and Kaukanen projects. We're proud to be working with our partners Puhuri Oy on these two new projects, which will utilise the EnVentus modular platform design for optimal power production. Both projects are being built on a merchant basis, highlighting the business case certainty Vestas' EnVentus platform provides to wind project developers around the world"*.

Antti Vilkkuna, Managing Director of Puhuri Oy said: *"It is a pleasure to continue the good partnership with Vestas in Keso and Kaukanen projects. Puhuri and its owners foresee a decade of strong growth in Finnish wind power sector. Successful transition to carbon free power generation requires a lot of wind among other carbon neutral power sources and solutions"*.

Turbine delivery to the sites will begin in the third quarter of 2022, with commissioning of both projects expected for completion by the end of the following quarter. Besides the EnVentus projects, Vestas has also successfully delivered the Kopsa II and Pyhäkoski projects for Puhuri Oy in Finland. Puhuri is a leading wind power company in Finland owned by 26 midsize utility companies.

Vestas has been selected for over 2.5 GW of wind project capacity in Finland, with over 1.4 GW installed. Following this order, Vestas' EnVentus platform will be delivered to over 800 MW of projects in Finland alone.

#### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 132 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to
