

News release from Vestas Mediterranean

Madrid, 22 June 2021

Vestas secures largest order ever in France

TTR Energy has placed a 122 MW order for the Sud Marne wind park, to be located in Marne department, France. The contract includes the transport, supply and installation of 30 V150-4.2 MW wind turbines, some of which to be delivered in 4.0 MW operating mode, as well as a 20-year Active Output Management 5000 (AOM 5000) service agreement.

“We are really proud of partnering with TTR Energy for Vestas’ largest order ever received in France. We expect that the reliability and high competitiveness of our 4 MW platform will contribute significantly to increase the yearly energy production of the wind park and optimise our customer’s business case”, says Vestas France Country Manager, Hugues Faivre.

Turbine delivery is planned by the second quarter of 2022 and commissioning is scheduled the fourth quarter of 2022.

Vestas installed its first turbine in France in 1991. Since then, the company has led the country’s wind industry with over 5.8 GW of wind capacity installed and over 2,300 wind turbines. These numbers position the company as the main contributor to the expansion of wind energy in France, with a 30 percent cumulative market share.

About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 136 GW of wind turbines in 84 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
