

News release from Vestas-American Wind Technology

Portland, 23 June 2021

Vestas receives 145 MW order from Leeward Renewable Energy to power the Panorama Wind Farm in the US

Vestas has secured a 145 MW order to power the Panorama Wind Farm in Colorado, U.S., which is owned by Leeward Renewable Energy. This order consists of a mix of 2 MW platform turbines including V120-2.2 MW, V110-2.2 MW, and V110-2.0 MW turbines.

This order follows Vestas' earlier agreement with Leeward Renewable Energy to supply 61 MW of V110-2.0 MW and V120-2.2 MW turbines to repower the Crescent Ridge Wind project in Illinois.

"We're proud to once again partner with Leeward Renewable Energy on a project that extends the successful run of Vestas' 2 MW platform in the state," said Jeff Fuchs, Vice President of Sales for Vestas in North America.

"Leeward is pleased to partner with Vestas and deliver sustainable wind energy and economic benefits to the people of Colorado," said Andrew Flanagan, Leeward Renewable Energy's Chief Development Officer.

The order includes supply and commissioning of the turbines, as well as a 20-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

Turbine delivery will begin in the third quarter of 2021 and construction is expected to be completed in December 2021.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 136 GW of wind turbines in 84 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
