

News release from Vestas-American Wind Technology

Portland, 25 June 2021

Vestas wins 60 MW repowering order in the USA

Vestas has secured a 60 MW order for an undisclosed repowering wind project in the U.S.

Located in an earthquake prone area, Vestas has developed a customised solution to fit the site's climatic conditions that includes a mix of V117-4.2 MW and V117-3.45 MW turbines delivered in 4.3 MW and 3.6 MW operating modes respectively. The tailor-made solution includes a tower design that can be sited in an active seismic zone and Vestas has offered local expertise to help the customer navigate extra regulatory procedures around seismic compliance that were critical to enable the full repowering of the project.

The order includes supply, transport, and commissioning of the turbines, as well as a multi-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

Turbine delivery will begin in the fourth quarter of 2021 with commissioning scheduled for the first quarter of 2022.

The customer and project names are undisclosed per the customer's request.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 136 GW of wind turbines in 84 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
