Madrid, 29 June 2021

Vestas wins 105 MW order in Spain from Iberdrola and Ocyener

Biocantaber, a company owned by Iberdrola and Ocyener, has placed a 105 MW order for the El Escudo wind park, to be located in the region of Cantabria in Spain. The contract includes the supply and installation of 23 V136-4.2 MW wind turbines and two V117-4.2 MW wind turbines.

The project's mixed technology configuration with two different wind turbine variants will offer maximum energy production in the site's medium and high wind speeds.

"Iberdrola continues to show its commitment to Cantabria, together with its local partners, with a second wind farm in the region, and is expanding its supplier base with Vestas", said Julio Castro, CEO of Iberdrola Renovables Energia.

"We are really proud to partner with Biocantaber for our first commercial project in Cantabria. This order showcases the versatility of our 4 MW portfolio and its ability to perform in the most diverse and challenging wind conditions. Its full converter technology also provides our customers with the reliability they need to operate in the Spanish grid, marked by an increasing participation of renewable sources", says Javier Ojanguren, Vestas Country Manager in Spain.

Turbine delivery is expected by the second half of 2022.

Since 1991, when Vestas installed its first wind turbine in Spain, the company has accumulated over 4.8 GW of installed capacity across more than 130 wind parks in the country.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 136 GW of wind turbines in 84 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 117 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
