

News release from Vestas-American Wind Technology

Portland, 30 September 2021

Vestas expands footprint in Canada with a 151 MW order from Pattern Energy

Vestas has received a 151 MW order from Pattern Energy Group LP (Pattern Energy) to power the Lanfine Wind farm in Alberta, Canada. This order consists of 35 V150-4.2 MW turbines, delivered in 4.3 MW operating mode.

“Vestas is pleased to grow our partnership with Pattern Energy, one of Canada’s largest wind power operators, as it expands its portfolio with this new project in Alberta,” said Laura Beane, President of Vestas North America. *“By utilising the proven V150 technology, this project will help contribute to Canada’s target of reducing greenhouse gas emissions by 40 to 45 percent by 2030.”*

“By utilising the Vestas V150, a quiet and powerful turbine, we are able to reduce the footprint of the Lanfine Wind project while maintaining its output,” said Mike Garland, CEO of Pattern Energy. *“The addition of Lanfine Wind will further expand our Canadian presence, which is growing to a total of ten wind power facilities across five provinces.”*

The order includes supply and commissioning of the turbines, as well as a multi-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

Turbine delivery begins in the second quarter of 2022 with commissioning scheduled for fourth quarter of 2022.

About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 140 GW of wind turbines in 85 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 120 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
